STATIC SHIFT GAME INSTRUCTIONS

How to Play

The goal of the game is to move the robot around the facility and collect all five batteries without getting hit by the drone. You will control the robot by using the arrow keys on your keyboard. For each battery you collect you will earn one point, once you collect all batteries or lose all three of your lives the game ends and displays a game over message.

Controls

Left Arrow: Move to the left.
Right Arrow: Move to the right.
Up Arrow: Jump.

Game Characters + Objects

The Robot: The player character, which can move left to right and jump

Batteries: There are five batteries on the level, when the Robot (player) touches a battery they collect it. A sound will display as well upon collection of a battery.

The Drone: This is the enemy, it automatically moves back and forth in patrol. If it touches you, that will be one life lost. Lose all three, game over.

Scoring + Winning & Losing

Winning Condition: Collect all five batteries before running out of lives.
Losing Condition: Lose all three lives before collecting the five batteries.

Scoring is just based on the batteries, your score has a minimum of 0 and a maximum of 5. 5 points is a win, everything else in between is just a high score.

Screenshots

These will be filled in as game development continues.
